Description

A education board designed for creative play and experimentation, adapted for use by children in wheelchairs. The board features three sets of gears, including high and low gear ratios and a small gear, a whiteboard for recording results and observations, and printed information with ideas for experiments. This unique product not only entertains but also educates. The structure is made of black steel, galvanized, and powder-coated. The board is made of HDPE plastic. The pipes are topped with spherical decorative elements.

Playground device consists of

- 2 x posts
- 1 x board
- 3 x sets of gears
- 1 x panel with printed ideas for experiments
- 1 x whiteboard
